RCI Industrial Visit Report

The visit was scheduled on 13th May 2022 for 50 students of Mechanical Engineering III year along with 3 Faculty members. Students assembled at the college campus at 8:30 AM and boarded the bus at 8:40 AM starting towards RCI, Hyderabad. The Students along with the accompanying faculty members reached RCI campus at 9:45 AM and security checks and visitor lists were verified by the security personnel.

The visitors were boarded on a RCI bus and escorted towards the auditorium at RCI. A presentation on vibrations and methods to control vibrations was given. Students were also shown a few testing machines for vibration testing such as a Climatic shaker of 4 and 7 ton capacity, simple shaker, etc. A demo of these vibrations testing machines was also given. The Students were provided with some snacks and refreshments by the host after which the visit continued.

After the demonstration of machines the students were given a brief presentation about the activities and contributions of RCI as an organization and its parent organizations, DRDO and DMRL. The visit continued with the students being escorted to the prototype display exhibition hall where they were shown a few prototypes of the missiles used by the Indian defense.

The students were then given presentations and demonstrations for Navigation systems, communication equipment, and other on board systems required for launching and operation of a missile. Missiles such as AGNI, BRAHMOS, AKAASH, PRITHVI, TRISHUL were also presented and their specific classification was also explained.

The faculty members thanked the hosts on behalf of all the visitors and the visit concluded around 2:00 PM and the students reached back to the college campus around 3:15 PM.

AN ARTIFICIAL INTELLIGENCE APPROACH FOR ONLINE PRODUCT REVIEWS AND REVIEW SYNTHESIS

"Innovative, Interesting, and Mind-blowing!"

Yup! That's exactly what our minds said as we were left gaping at the output. No! The stage performer didn't perform any act of magic. Rather, the output was yet another attribute of Artificial Intelligence.

Introduction:

On the 21st of July, 2022, students from Methodist College of Engineering and Technology were all set to enhance their knowledge as they attended a seminar regarding Artificial Intelligence by Prof. Praveen. K. Kopalle. The seminar, scheduled at Tagore Auditorium, Osmania University, was intended to promote the idea of usage of AI in our day-to-day lives.

The speaker, also serving as a Signal Companies' Professor of Management as well as Professor of Marketing at the Tuck School of Business, Dartmouth College USA, left no stone unturned in proving his notion of AI and marketing. Prof. Praveen, in himself served as an epitome of innovations, and a beacon of light for the knowledge-seekers. Sir enthralled the hundreds of inquisitive minds with his smart and logical approach leaving the audience dumbfounded.

Using the examples given below, sir proved his optimistic point on the controversial questions,

- "Can Machine Write Human Reviews?"
- "HUMANS AND MACHINES WORKING TOGETHER?"

Idea Concept

Consumers rely on reviews for information. They owe a deciding factor if the consumer would be willing to purchase a product online.

Therefore, It's really important for the reviews to be unambiguous, unbiased, and properly portray the product experience to the consumers. However, the idea of making a Program to provide product reviews online may spark doubts and uncertainty. The speaker was bold enough to explain his unwavering optimism towards the given concept.

Although AI generated reviews are seen unnecessary and fraudulent, they do provide a solution to the following issues

- New products with 0 reviews.
- Too many reviews on a product that are unambiguous at the consumer end

The Review writing AI will be capable of writing unbiased reviews on new products as well as summarized reviews on older products with hundreds of reviews by taking into account the human reviews.

This entire process was done using a Transformer Model Network Architecture.

A transformer model is a neural network that learns context and meaning by tracking relationships in sequential data. It's a machine learning model and is able to process reviews in order to write a much clear and unbiased version of the product.

Example: The Amazon's MTurk survey:

This is a survey which puts the AI reviews to test.

A total of 500-800 people are chosen from various professions who are made to shop online and browse the reviews under the products.

On a scale of 1-7, they are made to rate the reviews based on how likely it made them want to purchase a product upon reading a review.

On a point system of 1-100 they were also made to allot points to reviews which they thought was AI-generated using the Turing test.

For instance, liquid beverages were taken as products. All human reviews were of 20-35 words with each Beverage having atleast 10 reviews. 14,286 unique beverages and its attributes like smell, taste, and color were taken.

AI trained on 90% of the reviews using the aforementioned Transformer model.

Upon selecting any 3 random beverage items with 10 human and synthesized reviews, we had the following results:

1. 75% provided a rating of 4 or higher on purchase intent scale.
2. The Turing test was unable to distinguish between Human and machine reviews.
3. Detailed and clear machine reviews on review overloaded products

Besides explaining the concept of AI and marketing, queries from the audience side were very much entertained by the speaker. The young thoughtful minds presented various concerns about the concept. From questioning the use of AI in business reviews to the unbiasedness of the machine, each question was dealt deftly by the speaker.

In addition to answering all the questions in an easy-to-understand manner, Mr. Speaker also informed us of his team's current work on a new Transformer model project. The machine under the new model could also understand reviews and filter out possible misinterpretations resulting from the machine's inability to comprehend review habits.

We are immensely grateful to the University and Methodist College for providing us this opportunity to get closer with AI. We hope that these machines shall serve as a beneficiary source to humanity and mankind. Lastly, we assure that we will strive hard to be the best versions of ourselves and bring laurels to our institution.

TO WHOMSOEVER IT MAY CONCERN

This is to certify that the project work and report entitled **"Personal Medical Assistant"** embodies the original work of **Mr. Gursimar Singh** from **Methodist College of Engineering and Technology** (Computer Science) at **Linux World Informatics Pvt Ltd.**

The duration of the project undergone as mentioned above, under the mentorship of **Mr. Vimal Daga,** Technical Head was from **23rd Oct, 2021 to 22nd Dec,2021.**

Introduction of the Project

- The project "Personal Medical Assistant" is aimed to provide easy access to users by analyzing the disease on the basis of the symptoms they carry.
- This assistant reduces the span of time and gives a quick recommendation of the disease which could be diagnosed easily.
- This has been implemented using machine learning algorithms in the backend. These algorithms are providing the results with high accuracy and surely predict the right diseases which have been tested successfully.
- This is a user-friendly portal where they can easily manage to come up with the right disease according to their symptoms and can get a handy treatment for the time being.

Gist About the Project: This is a web portal namely Personal Medical Assistant which predicts the disease on the basis of the symptoms provided by the user. The web portal asks the user for the symptoms experienced by him/her and based on the user inputs it predicts the disease the user may be suffering from. The front end of the portal is designed using web technologies namely HTML, CSS, JavaScript, and is hosted on an Apache web server on the top of a Red Hat-based operating system. In the backend, the portal mainly uses Python as a programming language. Based on the User Input/Inputs the backend program predicts the results using three well-known algorithms namely Decision Tree Algorithm, Random Forest Algorithm,

Naive Bayes Algorithm each having an efficiency of more than 95%, and then the result is being shown out of the best among the three which will further increase the efficiency. Moreover, the dataset used for the training has 100+ records of different diseases and symptoms for better prediction of results.

Purpose of the Project: The major purpose of the project is to help people know the disease they are suffering from without visiting the doctor till the disease is a critical one so that people can know the disease they are suffering from without visiting the hospitals that are already in the saturated state in terms of capacity so as to decrease pressure on hospitals and doctors. This will in turn decrease chances of infection in the hospital premises and also help doctors and hospitals to focus on more critical patients who actually need hospitalization.

How it works: The User is being asked to choose five symptoms that they are having from the five drop downs that are being provided. The model training is being done with the help of a training dataset that is being provided at the backend along with a testing dataset to test the model which has an accuracy of almost 95%. These five symptoms after selecting go to the backend where they become the parameters for decision tree algorithm, random forest, and Naïve Bayes and after this these algorithm gives their respective output according to the input provided, then all three outputs are being compared with one another and the diagnosis which occurs more is being shown to the user on the GUI from where the user selects the symptoms along with it is written to consult the nearby doctor.

Technologies Used:

- Machine Learning: Machine learning is the study of computer algorithms that can improve automatically through experience and by the use of data. It is seen as a part of artificial intelligence

- **Deep Learning:** Deep learning is part of a broader family of machine learning methods based on artificial neural networks with representation learning. Learning can be supervised, semi-supervised or unsupervised.
- **AWS Cloud**: Amazon Web Services, Inc. is a subsidiary of Amazon providing on-demand cloud computing platforms and APIs to individuals, companies, and governments, on a metered pay-as-you-go basis.
- Red Hat Enterprise Linux 8: RHEL 8 is the operating system redesigned for the hybrid-cloud era and built to support the workloads and operations that stretch from enterprise data centers to multiple public clouds.
- **Docker:** Docker is a set of platform as a service products that uses OS-level virtualization to deliver software in packages called containers. Containers are isolated from one another and bundle their own software, libraries, and configuration files; they can communicate with each other through well-defined channels.
- **Jenkins:** Jenkins is an open-source automation server. It helps automate the parts of software development related to building, testing, and deploying, facilitating continuous integration and continuous delivery. It is a server-based system that runs in servlet containers such as Apache Tomcat.
- **Python:** Python is an interpreted high-level general-purpose programming language. Its design philosophy emphasizes code readability with its use of significant indentation. Its language constructs as well as its object-oriented approach aim to help programmers write clear, logical code for small and large-scale projects.
- **HTML:** The HyperText Markup Language or HTML is the standard markup language for documents designed to be displayed in a web browser.
- **CSS:** Cascading Style Sheets is a style sheet language used for describing the presentation of a document written in a markup language such as HTML.
- **JavaScript:** JavaScript, often abbreviated as JS, is a programming language that conforms to the ECMAScript specification. JavaScript is high-level, often just-in-time compiled, and multi-paradigm. It has curly-bracket syntax, dynamic typing, prototype-based object orientation, and first-class functions.

Conclusion: The delivered prototype demonstrates how we can determine a person's disease by knowing the symptoms for which a high accuracy model is being developed which offer around 90% accuracy. The GUI implemented is simple and user-friendly. Extending this project model and linking it with resources can increase its accuracy more and can maximize the added value of the data and various machine learning algorithms are being implemented to obtain the precision. Although this project has been developed with a great deal of care, research, thought and hard work, some smaller and insignificant amount of areas may have been left undressed, so scope has been left for customization

Future Scope:

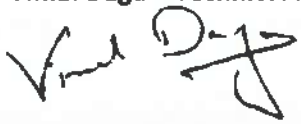

- Updating front-end
- Using multiple algorithms for better accuracy
- Updating as a chatbot with voice assistant
- Implementing computer vision to assist in emergency
- Guiding them for the medicine as well

We wish him all the success for his future

Regards

INDUSTRIAL VISIT

Akshaya Patra Foundation, Hyderabad

Date: 08.07.2022.

Report

Akshaya Patra reaches out to 18,00,907 children in 63 kitchens across 14 States and 2 Union Territories of India, providing them with freshly cooked meal on all school days. Currently, they are implementing the mid-day meal programme in 19,039 schools of the country, with plans to increase that number.

61 students with two faculty members Mrs. Sheebha Rani and Mrs. Swathi visited Akshaya Patra Foundation, Hyderabad on 08.07.2022. A manager-in-charge of Akshaya Patra accompanied the students and gave a briefing about the industry, Students came across about the process of making food where it was being prepared on steam which was generated using water, diesel and electricity. Later the processed food is packed in stainless steel containers and transported to various locations in custom built vehicles. They maintain very high standards of hygiene where there is very less human interference in the cooking process.

It was an informative, interesting and a successful visit. Students gained knowledge related to supply chain management, time management and about stress management.

Students along with HOD & Faculty while starting for the Industrial Visit.

Respected Sir / Mam,

Community service is an important factor in life of every individual in society especially for the students who are just going to nurtured and be the part of Community or society. Every student would aspire to be serving the society and being successful in life by achieving their dreams. Keeping this as our prime intention we have designed a workshop termed as "**Community Service" (CS) for an experiential learning.**

The Akshaya Patra Foundation is a not-for-profit organisation headquartered in Bengaluru, India. Our organisation strives to eliminate classroom hunger by implementing the Mid-Day Meal Scheme in the government schools and government-aided schools. Alongside, Akshaya Patra also aims at countering malnutrition and supporting the right to education of socio-economically disadvantaged children, Yet another initiative considered as sister concern of Akshaya Patra Foundation, Touchstone Foundation strives to satisfy the hungry intellect of thousands of youth using the principles of timeless Vedic wisdom.

Touchstone foundation cordially invites students of your esteemed institution to be part of this great initiative and get an opportunity for experiential leaning, this community service program is a half day event with the following activities;

v **An expert Presentation on *Mind Power and Management* -** A controlled mind is our greatest asset, an uncontrolled mind is our most formidable enemy. In this presentation, you will learn to master your minds & the ignite the flames of Personal Potential.

❖ **Visit to World's Largest NGO The Akshaya Patra Foundation -** students would be taken through Akshaya Patra Food Factory and will understand about the various technology and Management tools adopted in the Food industry.

❖ **Community Service** – Students will get a hands on experience on various Food distribution and Management aspects by personally involving in various services at our facility which will be a great leaning experience of hygiene management, resource management and crowd management, above all it helps one to experience compassion, gratitude and take a step towards becoming a good human being.

❖ Relish sumptuous Akshaya Patra Lunch (Optional)

❖ Certificate distribution for all the participants

Thanks

Respected Sir,

Sub: Request to grant us permission to attend the work shop cum industrial visit to to Akshaya Patra Foundation on 08.07.2022 – Regarding.

At the outset, I am happy to share with you that Akshaya Patra Foundation had sent an invitation for our MBA students to attend to a workshop cum industrial visit titled **"Community Service - for an experiential learning"**.

The Akshaya Patra Foundation is a non-for-profit organisation headquartered in Bengaluru, India. This organisation strives to eliminate classroom hunger by implementing the Mid-Day Meal Scheme in the government schools and government-aided schools.

Alongside, Akshaya Patra, Touchstone Foundation which is considered as sister concern, strives to satisfy the hungry intellect of thousands of youth using the Principles of timeless Vedic Wisdom. Touchstone foundation has cordially invited our students to be a part of this great initiative and get an opportunity for **Experiential Learning**, this community service – cum-industrial visit program is a half day event with the following activities: -

- An expert Presentation on "Mind Power and Management"
- Visit to World's Largest NGO "THE AKSHAYA PATRA FOUNDATION"
- Community Service – geo tagging for all their vehicles
- Supply Chain Management activities carried at the Akshaya Patra Foundation.
- Relish sumptuous – Akshaya Patra Lunch
- Certificate distribution for the participants.

Therefore, I request you to permit us in taking our students for this work shop cum industrial visit to Akshaya Patra Foundation on 08.07.2022, and also provide us transportation facility of Stanley Bus to accommodate 40 to 50 people.

Thanking you,

Yours faithfully,
