COLLEGE OF ENGINEERING AND TECHNOLOGY

Approved by AICTE New Delhi | Affiliated to Osmania University, Hyderabad

Estd : 2008 Address : King Koti Road, Abids, Hyderabad, Telangana, 500001 | Email : principal@methodist.edu.in

The Institution has facilities for alternate sources of energy and energy conservation measures

AY: 2022-2023

1. Solar Energy
2. Biogas Plant
3. Wheeling to the Grid
4. Sensor-based energy conservation
5. Use of LED bulbs / power efficient equipment

1. Solar Energy

1. The department of Electrical and Electronics Engineering in Methodist College of Engineering and Technology has a PV plant, which has solar energy capacity of 3.5KW and acts as an alternate energy to cater the need of the department with lighting and fan load at I&II floor-B-block.

The details of the 3.5KW solar PV modules and geo-tagged images, are provided below.

Alternate Energy initiatives such as:				
Percentage of power requirement of the HEI met by the renewable energy sources				
S. No	Years	Power requirement met by renewable energy sources(KWH)	Total Energy requirement(KWH)	Renewable energy source
1	2022-2023	3020	195288	Solar

Percentage of power requirement met by renewable energy sources = (Power requirement met by renewable energy sources / Total Energy requirement) X 100 = (3020/195288) X 100 = 1.55%

4. Sensor-Based Energy Conservation

Methodist College of engineering and technology is keenly focusing on effective of energy conservation within the campus. The institute implements Day-Night sensor based street 100W lights within the campus. 45W and 40W Sensor Based fan and lights attached with solar panels are also implemented in the campus. The power factor is the measure of effective usage of electrical power. There will be the excess power consumption, if the power factor is less than unity. The implementation of Automatic Power Factor Control panel reduces the power consumption, losses in the power equipments, greenhouse gases and electricity bills. Methodist College of engineering and technology implements sensor based Automatic Power Factor Control panel of 180KVAR for effective energy conservation.

5. Use of LED Bulbs / Power-Efficient Equipment

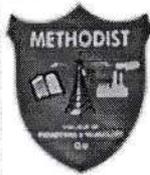

Methodist College of Engineering and Technology has a policy of employing LED lights throughout the campus. The Institute initiates the implementation of replacing all the lights with LEDs from A, B, C, D and E-blocks.

Percentage of annual lighting power requirements met through LED bulbs			
S.No.	Years	Total Lighting Energy requirements(KWH)	Lighting energy through LED(KWH)
1	2022-2023	55435.75	27515

Percentage of annual lighting power requirements met through LED bulbs= (Annual Lighting power requirement met through LED bulbs/Annual Lighting power requirement) x100=
(27515/55435.75) x100=49.63%.
