# About MCET

Methodist College of Engineering and Technology (MCET) An Autonomous, Non-Minority Educational Institution, established in the year 2008 on a sprawling 5.0 acres of historic Methodist campus at Abids, Hyderabad. The college provides a serene and tranquil environment to the students boosting their mental potential and preparing them in all aspects to face the global competition with a smile and emerge victorious.

The MCET is approved by AICTE, New Delhi and affiliated to Osmania University, Hyderabad. The College is accredited by NAAC with A+ Grade and all eligible Under Graduate– B.E Programmes are accredited by National Board of Accreditation (NBA). The UGC has granted autonomy to the college for ten years with effect from the Academic Year 2021-22.

The MCET has been established with the support of Executive board of Methodist Church in India that has been gracious and instrumental in making the vision of an Engineering College a reality. The vision is being accomplished by the innovative endeavors of Sri K. Krishna Rao, the Correspondent, Methodist College of Engineering and Technology.

Methodist College of Engineering and Technology strives towards excellence by imparting essential technical skills as well as a holistic approach towards grooming the students into responsible, worthy citizens of the future.

# DBM at a Glance

The Department is a dynamic center for academic excellence and leadership development. With a strong legacy of producing successful business leaders, our department offers a comprehensive education that fosters critical thinking and ethical decision-making. Our accomplished faculty, composed of both academic experts and industry professionals, provides students with the knowledge and mentorship they need to excel.

Equipped with state-of-the-art facilities, our campus is designed to inspire innovation and practical learning. Our program promotes a global perspective while emphasizing the importance of local impact. Beyond academics, students are encouraged to engage in extracurricular activities, industry events, and leadership programs to gain practical skills and confidence. Join us in shaping a successful future at the Department, where ambitions are realized.

## VISION

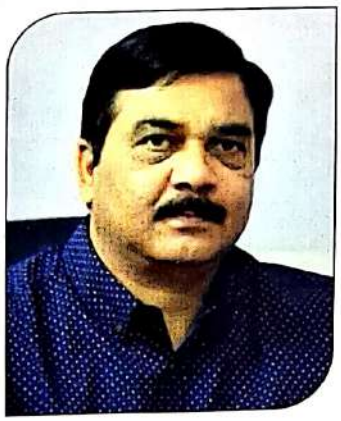

Our vision is to be the most credible and admired leader in business education.

## MISSION

- Committed in providing excellent academic delivery and infrastructure to the students. Imparting knowledge and skills in management for providing social consciousness and globally relevant thought leaders.
- To drive towards contemporary wisdom in management for. producing professionals of character and confidence to address the challenges posed by dynamic business environment.
- Nurturing future executives and entrepreneurs who can make a valuable difference in the corporate world and society.
- To strive for excellence in research and innovation with the aim of providing opportunities for students, faculty, all the stakeholders and also in building a sustainable, peaceful and prosperous world.

# Correspondent Message

Warm greetings to one and all

I am glad to see the Department of Business Management, Methodist College of Engineering and Technology is spreading its wings like an evergreen tree and exploring the opportunities. It gives me an immense pleasure to announce the 3rd Edition of Department Magazine which will showcase the skills and talents of the young minds.

The magazine endeavours in bringing to the front the aspirations and achievements of the college. It mirrors and colours the all round education provided in the college. The management of Methodist College of engineering and technology supports and aims for excellence in education and glad that the institution is taking all steps in this direction. This is possible only with commitment and dedication of the faculty and students.

My Hearty Congratulations to all the contributors on bringing out this beautiful collection of information and creative talent in students and staff.

Best wishes and regards

**Sri K. Krishna Rao**
Correspondent

# Director's Desk

It is with great pride and immense pleasure that I pen down this message for the 3rd edition of the magazine, brought out by the students and faculty of Department of Business Management, Methodist College of Engineering and Technology.

Over the years, our Business Management Department has excelled in providing a comprehensive and holistic education to our students. Through this magazine, the department intends to extend the classroom discussions to a larger audience, to present a blend of theory and practicality, and to provide a platform where ideas can be freely exchanged and debated.

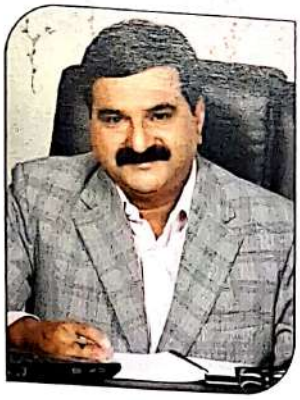

I fondly hope that this magazine will serve as a platform for our budding managers, thinkers, Alumni and leaders to share their perspectives, research, and experiences.

In today's rapidly evolving business landscape, it is crucial to stay informed, adaptable, and innovative. Through this magazine, the department may take initiative to address contemporary business challenges, celebrate achievements, and explore future possibilities.

I would like to commend the efforts of the Head of the Department, the faculty members, and the students who played a part in bringing this magazine to life. Your hard work, dedication, and vision have culminated in this beautiful piece of art and knowledge.

**Dr. M. Lakshmipathi Rao**
Director, MCET

With immense pleasure and pride, the Department of MBA at our college is delighted to release the 3rd edition of departmental magazine. This occasion marks a significant milestone in the journey of our MBA program, highlighting their achievements, commitment to excellence in education and the dissemination of knowledge among our MBA students, faculty, and alumni.

The MBA program at our Institute was founded with the vision of nurturing future leaders, thinkers, and entrepreneurs who would not only excel in their respective fields but also contribute positively to society.

This magazine is more than just a collection of articles and images, it is also a reflection of the remarkable journey of MBA students, faculty, and alumni boarded together. It encapsulates the dedication of our students, the support of our esteemed faculty and staff, and the contributions of our accomplished alumni. It showcases the academic atmosphere, innovative ideas, and collaborative spirit that define the MBA department.

I extend my congratulations to everyone associated with the MBA department, HoD, and editorial board for bringing out very informative magazine. May this magazine inspire everyone to aim higher, dream bigger, and work together to realize our collective vision for a brighter and more prosperous future.

Thank you, I eagerly anticipate witnessing the continued growth and success of our MBA program.

With warm regards
**Prof. Prabhu G Benakop**

# HOD Message

Department of Business Management is very delighted to release the 3rd Edition of our Department magazine which reflects the hard work dedication, sincerity of our beloved students and staff. It will be an ongoing process where our senior students will leave their footprints for the upcoming batches to continue the trend on a regular basis. Every year, upcoming batches should raise the benchmark set by their seniors.

As quoted by Albert Einstein, "I don't teach my children but create conditions for them to learn." Marks do not make one, a great human being..... Thoughts do!!!. We teach them to dream big and reach great heights. Our mission is to develop Smart managers, Great humans, Responsible citizens and Dynamic Global leaders with active and Creative minds, with a sense of gratitude and compassion for others, and with the courage to act on their beliefs.

# Editor's Desk

***From the Editor's desk...***

"Education is not confined to classrooms, it is the spark of ideas, creativity, and expression that shapes the future."

With immense joy and a sense of fulfilment, I feel privileged to present the third edition of Crescendo, the Department of Business Management Magazine. Each edition has been a journey of ideas, creativity, and innovation, this third edition stands as a testimony to the evolving spirit of our students.

The magazine is more than a collection of writings, it is a reflection of the energy, aspirations, and potential of our young minds. By providing a platform for students to express their thoughts, share their achievements and showcase their talents, Crescendo continues to encourage critical thinking, creativity, and collaboration. It captures not only the academic excellence but also the diverse extracurricular engagements that shape our students into well-rounded individuals.

I take this opportunity to thank the Management, Director, Principal, and HOD DBM for their constant encouragement and support. I also extend my heartfelt appreciation to the faculty and students who have contributed their time, effort and ideas to make this edition possible.

As we turn the pages of this third edition, let us celebrate the growth of our department, the achievements of our students and the collective vision that drives us forward.

Thank you, Everyone.

HAPPY READING..!

# "SEBI INVESTOR'S AWARENESS PROGRAM"

On 2nd December 2024, the Department of Business Management organized an Investor's Awareness Program in collaboration with the Securities and Exchange Board of India (SEBI) to promote financial literacy among students. The seminar introduced participants to the role of SEBI, the structure of securities markets, and basic investment principles such as diversification, risk-return, and long-term planning. Emphasis was placed on investor protection measures and SEBI's efforts in preventing frauds and ensuring fair market practices. A special highlight was the discussion on technology in investments, including the rise of digital trading platforms, robo-advisors, and mobile-based investment apps.

Students were encouraged to adopt technology responsibly while staying alert to risks like fraud and data breaches. The session also included practical insights into mutual funds, SIPs, and stock trading, along with real-world case studies that illustrated the importance of ethical and informed financial decisions. The program concluded by underlining how future managers must balance profitability with ethics and investor trust, making it a highly valuable experience for students preparing for careers in management and finance.

## TRADITIONAL BANKING Vs FINTECH IN INDIA : A COMPARATIVE ANALYSIS

**Mrs G. Shiba Rani**
Associate Professor

India's financial sector is evolving rapidly, with fintech firms emerging as both competitors and collaborators to traditional banks. While banks continue to dominate in lending and deposits, fintechs are leading in payments, micro-lending, and customer-centric digital services.

This growth has been fuelled by Aadhaar-based e-KYC, UPI, Smartphone adoption, and supportive government policies. UPI, for instance, processed over ₹17,200 crore in transactions in FY 2024–25. Fintechs use AI to offer small-ticket loans, digital wealth platforms, and neo-banking services that appeal to tech-savvy users.

Regulators like RBI and SEBI are tightening oversight through digital lending guidelines, data localization rules, and sandbox frameworks. While banks benefit from regulatory clarity, fintechs often face evolving compliance environments.

The relationship is shifting from disruption to co-opetition. Banks use fintech platforms for on boarding and automation, while fintechs leverage banks' capital and credibility. Still, fintechs are beginning to dominate certain segments like low-value payments and consumer credit.

For investors, traditional banks offer stability, while fintechs provide high growth but higher risk. The most promising models combine both. India's financial future lies in a hybrid model '**Fintech within Banking**' where trust, innovation, and collaboration drive the next phase of financial inclusion and efficiency.

## EMPLOYEE EXPERIENCE (EX) : THE NEW HR FRONTIER

**Mr A. Swathi**
Assistant Professor

In today's business world, organizations are realizing that people are their greatest strength. This shift has brought Employee Experience (EX) into focus. Unlike traditional engagement, which measured motivation, EX looks at the entire journey of an employee-from joining to exit-capturing how supported, respected, and valued they feel throughout.

For MBA graduates, understanding EX is essential. As future managers, you will not only be expected to achieve business goals but also to create environments where employees feel a sense of belonging and purpose. A strong employee experience fosters innovation, productivity, and long-term commitment, directly shaping organizational success. The modern workforce, led by Millennials and Gen Z, seeks more than pay checks. They expect flexibility, learning opportunities, and workplaces that value well-being. Managers who recognize these needs and design supportive cultures will be more effective leaders. Moreover, with hybrid and remote work becoming common, digital employee experience has become crucial. Ensuring employees feel connected and engaged, even virtually, is now part of a manager's responsibility. Indian companies, from startups to multinationals, are already investing in wellness programs, growth opportunities, and inclusive practices. These are not just HR initiatives but require involvement from managers across functions. Whether your MBA specialization is finance, marketing, or operations, you will play a role in shaping EX.

Employee Experience is more than an HR concept-it is a leadership skill. For MBA students, mastering it will mean leading with empathy and vision, preparing you for the workplaces of tomorrow.

# THE FUTURE OF SUSTAINABLE FINANCE

**Mrs. Roubena Sultana**
Assistant Professor

Sustainable finance is rapidly becoming one of the most influential trends in the financial world, with long-term implications for businesses, investors, and economies. It involves directing investments toward projects and companies that prioritize environmental, social, and governance goals, such as renewable energy, green infrastructure, and ethical corporate practices. As climate change concerns intensify, governments and institutions are increasingly supporting green bonds, carbon credit trading, and focused investment funds. This not only reduces environmental risks but also creates stable, future-oriented financial opportunities.

For business management students, sustainable finance is more than just a buzzword it represents the future landscape of decision-making. Companies with strong ratings are attracting more investors, and banks are aligning lending policies with sustainability goals. Understanding sustainable finance equips future managers to balance profitability with responsibility; ensuring businesses remain competitive while addressing global challenges. With international regulations and consumer demand both shifting toward sustainability, this trend is set to stay and shape the way finance is practiced for decades to come.

# ESSENTIAL SKILLS FOR MBA GRADUATES

**C. SHYAM SUNDER**
Assistant Professor

**Communication skills**

Communication skills refer to your ability to clearly and concisely convey even complex information. It involves verbal and written communication, along with active listening.

**Leadership skills**

The term leadership refers to the ability to guide and motivate other individuals or groups. With leadership skills, you can motivate and manage others to achieve specific goals.

**Time management skills**

Time management skills refer to your ability to organise and prioritise tasks in a way that makes you more efficient.

**Critical thinking & Problem-solving skills**

Critical thinking abilities help you analyse a situation and make a quick and informed decision to resolve the problem. Problem-solving skills allow you to identify the source of a problem. This helps you develop an effective solution to the problem.

**Entrepreneurial and Innovation Skills**

These are the skills that can help you thrive in the business world. Whether or not you dream of becoming an entrepreneur, embracing innovation and entrepreneurial skills can help you to think outside the box when faced with a business conundrum.

## GOOD & SIMPLE TAX – THE GREAT INDIAN FESTIVAL

At the 56th GST Council Meeting, Finance Minister Nirmala Sitharaman announced a major reform - streamlining GST from four slabs (5%, 12%, 18%, and 28%) to just two (5% and 18%). Effective September 22, 2025, this move simplifies compliance, eases the burden on middle-class families, and brings festive cheer ahead of Diwali and Dussehra, making it a true "Great Indian Festival" for taxpayers.

**SIMPLIFIED GST STRUCTURE – KEY HIGHLIGHTS:**

| | | |
|---|---|---|
| **Two Slabs** | : | GST simplified to 5% & 18%, with 40% on luxury/sin goods, 12% & 28% scrapped. |
| **Essentials** | : | Daily staples, some medicines, breads, pulses Nil/5%. |
| **Appliances** | : | TVs (≤32"), ACs, fridges, washing machines 18% (earlier 28%). |
| **Healthcare & Insurance** | : | Education, hospital services, life & health insurance. Exempt; lifesaving drugs Nil/5%. |

"The Great Indian Festival "Announced ahead of Diwali and Dussehra, the simplified GST eases the tax burden, boosts consumption, and spreads financial cheer. By making taxation truly "Good and simple," this reform unites citizens in growth and happiness rightly earning the name Great Indian Festival.

## ARTIFICIAL INTELLIGENCE (AI) SHIFT POSITIONS INDIA AS A GLOBAL AI LEADER, ADVANCING BUSINESS INNOVATION AND ECONOMIC EFFICIENCY THROUGH AI TECHNOLOGIES IN 2025.

KAVADI SAI KUMAR
H.T. No.160724672026

In 2025, India stands at the forefront of a major business transformation driven by artificial intelligence (AI), with close to 90% of companies treating AI adoption as a strategic priority to strengthen operations, expand workforce capabilities, and accelerate innovation. Frontier firms are pioneering human–AI collaboration models that enhance creativity, decision-making, and speed, while automation is streamlining workflows and unlocking new forms of productivity. The Indian AI market is expected to grow rapidly, projected to triple and reach $17 billion by 2027, supported by strong government initiatives, digital infrastructure, and a rich talent pool.

This growth carries the potential to contribute trillions of dollars to India's economy over the coming decade, positioning the country as a global AI powerhouse. The impact of AI is evident across sectors: finance is leveraging it for fraud detection, algorithmic trading, and customer automation; healthcare is advancing diagnostics, drug discovery, and personalized medicine; agriculture is adopting precision farming and yield prediction tools; retail and logistics are optimizing inventory, forecasting demand, and delivering personalized customer experiences; and manufacturing is embracing predictive maintenance, robotics, and automation for higher efficiency.

Alongside this rapid adoption, Indian businesses are also focusing on responsible AI, recognizing the importance of ethics, data security, and transparency in building trust. Workforce upskilling has become a central strategy, as enterprises invest in preparing employees to work alongside intelligent systems and adapt to evolving roles. While challenges such as cybersecurity risks and regulatory frameworks remain, India's emphasis on responsible innovation, combined with its entrepreneurial spirit and strong digital ecosystem, ensures that AI will be a cornerstone of its future economic and business growth. Overall, 2025 marks a defining moment as India transitions into an AI-first era, reshaping work, industries, and competitiveness on the global stage.

# FROM STRESS TO STRENGTH
# THE ART OF STAYING POSITIVE

SHRUTI BIRADAR
H.T. No.160724672104

In today's fast-paced world, stress has quietly become a companion in almost every stage of life. Students feel it while preparing for exams, professionals encounter it when chasing deadlines, and families experience it while balancing responsibilities and finances. Stress often seems like an unavoidable burden, yet it does not always have to be the enemy. When approached with the right mindset, stress can transform into a hidden source of strength, pushing us to grow, adapt, and rise above challenges.

Stress may feel like a roadblock, but it is not about escaping pressure-it is about how we respond to it. History and modern life are full of examples of individuals who turned immense stress into resilience. Malala Yousafzai transformed personal danger into a global movement for education, while Indra Nooyi rose against all odds to become one of the most respected corporate leaders. Their journeys remind us that determination and optimism can turn adversity into opportunity.

Understanding stress is the first step. It is a natural signal, preparing our mind and body for action. When managed wisely, stress sharpens focus, enhances performance, and drives growth. The key lies in perspective-seeing it as a challenge to overcome rather than a weight to carry. Practical approaches include cultivating a positive mindset, maintaining a healthy lifestyle through exercise and rest, practicing mindfulness and meditation, and viewing setbacks as lessons rather than failures. Equally important is leaning on a strong support system of friends, family, or mentors who provide strength and guidance.

Ultimately, positivity does not mean denying difficulties-it means facing them with courage and hope. By training ourselves to practice gratitude, celebrate small wins, and stay surrounded by uplifting influences, we can transform stress into inner strength. Life's challenges are not here to break us; they are here to shape us into stronger, wiser, and more resilient individuals.

Y.A. Rishita Kumari
H.T. No.160724672062

# MASTERING FOCUS IN DISTRACTED WORLD

In today's scenario information which we need is available at the tap of a finger and digital distractions are constantly competing for our attention. These distractions are everywhere-social media, notifications, and endless entertainment with constant information overloaded, making it increasingly difficult to stay focused on the task.

Maintaining focus is not about forcing oneself to study for long hours but about training the mind to prioritize and sustain attention towards the goals while filtering out unnecessary distractions.

One has to understand how attention works and practices techniques like mindfulness, time management and digital discipline to strengthen concentration on the task. And have to maintain daily schedule including sleep pattern and healthy eating habits which strengthen mind ability to focus. Through daily practice and awareness, mastering focus becomes powerful tool for transforming one's academic journey and life. It also helps to gain emotional resilience by making one ready to face challenges calmly. It trains mind to concentrate for not only improving performance but also unlocks one's potential.

In a world full of distractions, the ability to focus is what sets successful individual apart-and it is a skill that everyone can learn and apply to achieve their big dreams with full confidence and clarity.
"Starve your distractions, feed your focus"

# YOUTH AS CHANGE-MAKERS : BUILDING A BETTER TOMORROW

Change is no longer a distant promise - it is happening all around us, and at the heart of this transformation are young people. They are not waiting for permission or sitting on the sidelines; instead, they are stepping forward with bold ideas, fearless energy, and a determination to make the world fairer, greener, and kinder. From climate strikes to social justice campaigns, from tech innovation to grassroots volunteering, the youth are proving that they are not just the leaders of tomorrow but the changemakers of today.

What makes youth so powerful is their fresh perspective. Unlike older generations conditioned to accept "this is how things are," young people dare to ask, "Why not? What if we tried something new?" Growing up in a connected world, they can learn, organize, and inspire action in seconds. Whether its students creating apps for education access, teenagers campaigning for mental health awareness, or youth groups challenging inequality, their impact is both real and measurable. They are delivering solutions, not just slogans.

Yet, the path is not without challenges. Many face barriers such as limited resources, lack of recognition, and the dismissal of their voices by those in authority. This makes it crucial for communities, educators, and leaders to do more than praise them—we must empower them. That means mentoring without controlling, funding their ideas, ensuring their inclusion in decision-making, and celebrating their achievements.

Building a better tomorrow is not a solitary mission. It requires collective effort, with young people at the forefront and society standing beside them. When we believe in youth, support them, and walk with them, we unlock extraordinary potential. Because when youth rise, the world rises with them.

# THE RISE OF WOMEN LEADERS IN BUSINESS & BEYOND

For decades, leadership carried a narrow image-defined by one voice, one perspective, and one way of doing things. Today, however, the landscape is changing, and a powerful shift is unfolding across boardrooms, startups, governments, and communities. Women are not just taking seats at the table; they are reshaping the very table itself. This is more than a passing trend-it is a movement, the rise of women leaders who are bold, brilliant, and unapologetically breaking boundaries.

From CEOs running global corporations to entrepreneurs launching disruptive startups, from activists leading social change to scientists making discoveries that transform the world, women are redefining what leadership looks like. Leadership, as they demonstrate, is not a single mold but a spectrum of voices, perspectives, and approaches that reflect resilience, creativity, and inclusivity. What makes this rise even more remarkable is the way women lead-not solely with authority, but with purpose. They bring empathy into decision-making, resilience into challenges, and a commitment to uplifting others while climbing their own paths. Yet, behind every woman in leadership lies a story of challenges-of being underestimated, told to "wait her turn," or having to balance ambition with societal expectations.

These struggles have not held them back; instead, they have fueled determination to create new opportunities and redefine possibility. And what is most inspiring is that women are not rising alone-they are creating networks, mentoring others, and building pathways for future generations of women leaders to follow. The rise of women in leadership is not just changing the face of business and beyond-it is shaping a more inclusive, balanced, and purpose-driven world for all.

# FROM STACKS TO SCREENS: DO LIBRARIES STILL MATTER IN THE AGE OF AI?

AMATUL FURQANA
H.T. No. 160724672082

braries were once the heart of education-the scent of paper, the quiet turning of pages, and ws of books shaped the student experience. Today, however, information is just a click away. th AI tools, e-books, and online journals, knowledge is instantly available. This shift raises the estion: Are libraries becoming less relevant? At first glance, the answer seems yes. Why spend urs hunting through shelves when AI can explain, summarize, and analyze topics in seconds? search that once took days now takes minutes. Let's be real-digital platforms are faster and way ore convenient than traditional libraries.

t libraries still offer something unique-focus, discovery, and human connection. Their calm environment encourages ncentration, and those random shelf discoveries often lead to fresh ideas. Librarians aren't just bookkeepers-they are the ides who can help you when search engine or apps come up short and nothing beats the experience of holding a real ok, pausing, and reflecting. Instead of fading, libraries are transforming. Many now blend physical collections with gital tools, creating hubs where technology complements human knowledge. They promote collaboration, critical inking, and a love of learning that goes beyond instant answers.

, are libraries losing their place? Not really. Their role is shifting-from being simple book storerooms to becoming spaces discovery, reflection, and engagement. AI can make research faster, but it cannot replace the depth, focus, and human uch library offers. Libraries are like hidden treasures on campus-quiet corners, endless knowledge, and sparks for big eas. More than shelves of books, they create space for curiosity, focus, and growth. In a fast digital world, libraries remind that true learning goes beyond instant answers and becomes a journey of discovery.

conclusion, libraries are not disappearing-they are adapting. As screens dominate, they remind us that true learning ppens where technology meets human connection. Before skipping the library, remember: AI may provide answers, but raries spark the questions.

# WOMEN IN LEADERSHIP: BREAKING BARRIER IN CORPORATE INDIA

In recent years, India has seen a significant increase in women's participation in leadership roles in trade, politics and entrepreneurship. While challenges remain, shift indicates a new era of inclusive development.

According to a 2023 report, women hold about 18% of the leadership situation in Indian companies, a number that has doubled in the last decade, but is still behind the global average. This difference has so far exposed both progress and distance.

It has been proved that gender is not a barrier to global trade excellence. Their trips inspire a new generation of wome professionals who are stepping into boardrooms and entrepreneurship ventures.

However, systemic challenges such as glass roof, payment gaps and lack of mentorship opportunities still lim development for many women. Studies suggest that companies with high gender variations in leadership perfor financially better and promote greater innovation. This proves that inclusion is not only a matter of fairness, but also strategic trade benefit. For MBA students, the major technology test is clear tomorrow's leaders should not only break th obstacles for themselves, but also create an inclusive workplace that empowering everyone to grow.

In today's fast developed business environment, the leadership is no longer defined by traditional or rigid structure Rapidly, various approaches that are being renovated by diversity, inclusion and recognition add value to decision makin One of the most important changes in this context has been a gradual but steady increase in women's leadership roles especially in India.

In the last decade, women are breaking stereotypes and entering boardrooms, startups and executives.

# FROM VILLAGE ROOTS TO CITY WINGS

I was born and brought up in a small village where life moved slowly and opportunities wer limited. Books and schools gav me the basics, but there was little scope to grow beyond tha Coming to the city for my college studies completely changed my path. Here I have gained skill knowledge, and confidence that I never imagined before.

In my village days, I struggled with stage fear. Even speaking a few words in front of people made me nervous. But in th college, I was encouraged to take part in programs and activities. Step by step, I overcame that fear, and today I can stan and speak with confidence. Back in my village, there were hardly any events or organizations to show our talents. The cit college gave me that platform. I not only participated but also got the chance to conduct and organize events, which bui my leadership qualities and taught me teamwork.

Another area of growth has been financial and practical skills. Earlier, I had very little knowledge, but throug responsibilities and tasks in college, I learned resource management, planning, and decision-making. I also develope time management and creative thinking skills, supported by friendly and approachable faculty. The industrial visi arranged by the college further connected classroom learning with real-world experiences.

Above all, our HOD ma'am has been a constant source of strength motivating, supportive, and always encouraging us t aim higher. My journey from village to city has truly been one of transformation. From silence to confidence, from limite chances to wide opportunities, every step has shaped me into a better person. I still carry the simplicity of my roots, bu now I also carry the courage, skills, and dreams that my college in the city has given me.

This experience has taught me one simple truth: it does not matter where we come from; what defines us is our effort, ou courage, and our will to grow.

# HOW AI IS SHAPING THE FUTURE OF EDUCATION AND LEARNING

SADANAND JAHNAVI
H.T. No. 160724672059

Artificial Intelligence (AI), once confined to science fiction, is now transforming almost every aspect of human life-from healthcare and finance to entertainment. Yet one of its most profound and often overlooked impacts lies in education. By mimicking human-like intelligence in tasks such as problem-solving, decision-making, and language understanding, AI is not only changing how we learn but also how teaching itself is delivered and managed.

In the classroom, AI offers personalized learning experiences that adapt to a student's pace, strengths, and areas of improvement. Intelligent tutoring systems can provide real-time feedback, while AI-driven platforms can automate assessments and administrative tasks, freeing educators to focus on what matters most-mentorship and guidance. Beyond efficiency, AI is making education more inclusive and accessible, bridging gaps for learners across diverse geographies and backgrounds.

The future promises even deeper integration of AI in education. Immersive technologies like AI-powered virtual reality (VR) and augmented reality (AR) are opening doors to experiential learning, from exploring ancient civilizations to simulating complex scientific experiments. These innovations not only spark curiosity but also make learning more engaging and effective.

For management students, understanding AI's role in education goes beyond theory-it opens up tangible opportunities. EdTech innovation is a growing space where students can design AI-powered solutions to improve teaching and learning. Strong analytical skills can be applied to generate insights from educational data, helping institutions identify gaps and strategies for improvement. Moreover, as future leaders, management graduates can guide schools, universities, and training organizations through digital transformation, ensuring that AI adoption remains ethical, equitable, and balanced with the irreplaceable human element of education. Ultimately, AI is not here to replace educators but to empower them, creating a learning ecosystem that is more personalized, inclusive, and future-ready.

# BE THE YOU YOU ARE MADE TO BE

RIDHI JAISWAL
H.T. No. 160724672015

If you feel nervous While facing a crowd, remember that there is a reason you're on stage and they are not.

Stop hiding behind the masks you have fabricated to blend into the society. Be uniquely you. Create an environment where everyone can be themselves.

Many of the beliefs we have stored in our minds are lies and we suffer because we believe these lies.

Learn to treat people not as bad as they are, but as good as you are. In doing so, you might become the first person in these people's lives who treated them with love, dignity and deserves to be treated well.

# LESSONS LEARNED BEYOND SYLLABUS

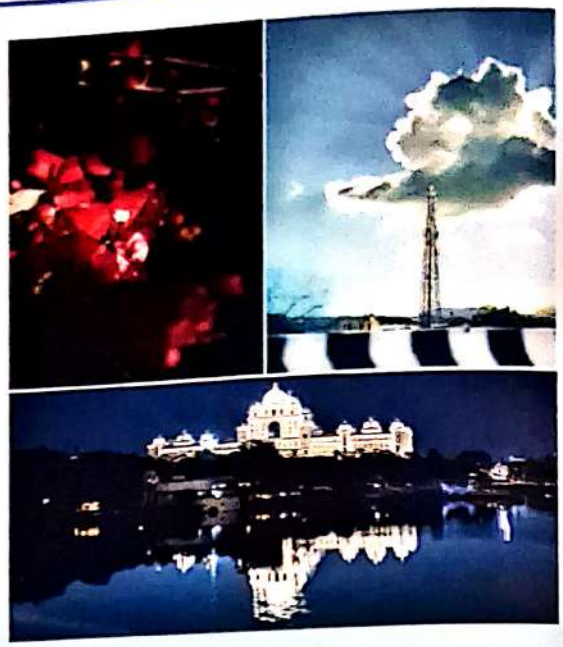

SUFIYA NAAZ
H.T. No. 160724672008

The classroom gives us facts and more,
Yet life holds lessons at its core.
Balancing studies with work and play,
Taught me to shape each passing day.
Failures came, but did not last,
They turned into lessons from the past.
Resilience grew with every test,
Teaching me strength is life's true quest.
Through teamwork's bond, I learned to share,
To listen, to trust, to show I care.
Discipline and drive lit up my way,
Guiding my steps each busy day.
Beyond the books, I found my voice,
Discovered my passions, made my choice.
For life's true lessons, deep and wise,
Are learned beyond what a syllabus ties.

# Success Speaks

## N.G. Pradhyumnnan

When I think of my career goals, I ask myself what I want to accomplish in life. I know that I want to be a game changer in business, solving real-time problems, and I want to continue to do that. Starting as a Sales Executive after my MBA, I climbed all my way up to a company board member, finally becoming a founder of a fintech Startup (Optiwinsfintech.com), marking a global footprint, now serving clients in 7+ first-class countries. Today, I deal with AI (Artificial Intelligence) in the financial world, catering tailored solutions for many businesses.

## Sumaiya Ganesh

MBA Finance and Marketing. My two year journey of the college transformed me from a naïve girl to a confident woman. Started my career at Amazon through college placements, later joined Thomson Reuters for US taxation. A year later it was probably fate, I gave a casual interview at Delloite and got selected, there was no looking back there after. I started as an Associate & now I am a Senior Manager. All I wanted was to make my name in the field I'm working. Forever grateful to my faculty for their great push and support throughout my two year journey at Methodist.

## Mrinal Sen Naroji

I graduated from Methodist at the age of 23 with high expectations for a better life. In the beginning, I began working at CtrlS as an intern before working my way up to become a regular employee. During a growth cycle, I moved on to other organizations before returning to CtrlS as a manager overseeing a sales team. More than completing my goal, I focused on ways for evaluating client opinion and develop a strategy that would enable me to finish the task within the allotted time. I always believe " TRUST YOURSELF TO BE YOU"

## A. Swathi

Being an alumna of Methodist and now serving as an Assistant Professor in the Department of Business Management at Methodist College of Engineering and Technology. I passionately embraced the teaching profession, believing that success is a journey rather than a destination. Over the past Nine years, this journey has been deeply fulfilling and continues to inspire me every day. My greatest success lies not in personal milestones but in witnessing the positive impact I create in the lives of my students. I celebrate every achievement when I see my students growing in confidence, pursuing their aspirations, and realizing their dreams. Guiding them along this path remains my most meaningful accomplishment.

## Eshwar Sai

I'm a Professional Lawn Tennis Coach "National Gold medalist Started a company with my friends HOLISTIC SPORTS PRIVATE LIMITED and also working for two academies for last 10 years Awasa (Anandnagar welfare sports associations) (Khairthabad) Sai brothers tennis academy (Osmania medical college KOTI)

Scanned with OKEN Scanner

## Muneer Uddin

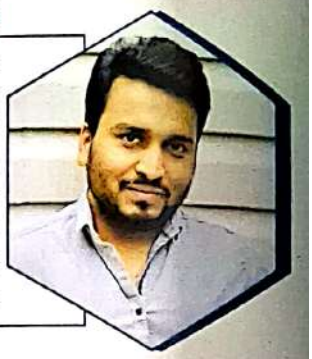

My career journey has been a testament to the power of resilience, adaptability and the pursuit of one's passion. From a corporate career at Deloitte to serving as a Bailiff at the City Civil Court and venturing into entrepreneurship with "Panoway 360 Virtual Tours" I have learned that life's challenges can lead to unexpected opportunities. My journey at Methodist has been a very enlightening experience, and has helped me to achieve greater heights in the field of Entrepreneurship.

## Rohan

Hi, I started my career journey with the Raam Group as an Executive Assistant to the director and also a core team person for making strategies for the group. The group is into an Auto-Retail Chain, Real Estate, Construction and Consumer-Retail. The Group channel partners are Mercedes-Benz, MG Motors, Hyundai, Tata Motors, Honda Two-Wheeler, Hero Two-Wheeler, Woodland, Bata, Titan, Fastrack, Peter England, and many more. The Group had spread across Telangana, Andhra Pradesh, and Karnataka with a team size of 2000+ employees

## Venkat

Hello, this is Venkat a 2011 MBA alumni of MCET. I started my career as Tax Associate in US Taxation with Thomson Reuters and then moved to Ryan as a Senior Tax Associate, while working on multiple tax applications, after working for about 3.5 years in India in US Taxation, I then applied for masters in USA with specialization in Database Management and moved to USA in 2015. After completing my masters in CIS, I am working as a Senior Data Analyst for more than 6 years now focusing on Data Management, Data Governance on projects associated with organizations like World Bank, Comcast and NRECA.

## Sai Kumar

My path to success has been an exciting and life changing journey. Methodist College was the turning point of my life. I learned something I was passionate about. College taught me not only academics but also time management & building strong relationships. I'm grateful for the help and guidance that I received from my professors. I started my career with the knowledge and skills I had gained. Overtime I climbed the career ladder learning and growing with each obstacle I faced.

## Sree Pooja

I have completed my engineering from JNTU in 2014 and pursued my MBA (Finance) from Methodist college of management. It has been credible opportunity for me to learn finance studies with the help of the lecturers and HOD. This helped me to get the immensible knowledge in area of Finance. I have worked for major MNC's like accenture and Deloitte, in banking sector with Abu Dhabi Islamic Bank ( UAE) and in Ahmed seddiqi and sons (Rolex partner in UAE).Currently I am working in ENOC (semi government entity) as a Team lead in Dubai, UAE

## Kadode Sai Kumar

I joined Methodist College with a common mindset, but once the journey began, it completely transformed me into a more confident and determined individual. The quality education, combined with the guidance of my professors, allowed me to hone essential skills like time management, leadership, and critical thinking, which have been invaluable in my professional life. The knowledge I gained at Methodist has been instrumental in my smooth transition from college to corporate, and I am now proud to be working at Ryan as a Tax Associate. In addition to my career, I have also pursued my passion for martial arts, becoming a national-level gold medalist. I continue to practice and conduct various workshops to share my knowledge and inspire others. Methodist College not only shaped my career but also encouraged me to pursue my passion, making me the person I am today.

## A. Samuel

"My MBA journey wasn't just about earning a degree - it was about discovering my potential." In 2023, I completed my MBA as part of the first batch for autonomous studies. This unique experience not only taught me proper management skills but also invaluable life-leading lessons that continue to shape my personal and professional growth. I was fortunate to learn from some of the best teachers, whose guidance prepared me for real-world challenges.After graduation, I began my career as an HR professional at Prasaditya Group. Shortly after, I was offered an opportunity to join NTT DATA, a renowned multinational company. Transitioning from a local firm to a global MNC has been a rewarding and transformative experience in my career. I look back on my MBA journey with immense gratitude and pride.

## Kancharla Naga Rani

My journey from our college to UBS has been nothing less than a dream come true. When I joined the MBA, I carried a simple dream - to step into the corporate world with confidence and make my Family and College proud. Those two years gave me more than just knowledge; they gave me strength, self-belief, and countless opportunities to grow. Every challenge shaped me into a better version of myself. The placement process at UBS was not easy, but it taught me the importance of patience, consistency, and trust in my own abilities. The moment I received the offer letter is one I will cherish forever - it was not just a job, but proof that dreams do come true with hard work and determination.

## Kalle Satish

Pursuing my Post-Graduation in MBA (HR) at Methodist College has been one of the most rewarding journeys of my life. Over the past two years, I have gained not only academic knowledge but also valuable life lessons that shaped my personal and professional growth with constant guidance from my professors and I was able to build the confidence and capabilities required to step into the industry. Today, I feel proud to have been placed at Brihaspathi Technologies Limited, an opportunity that marks the beginning of my professional career in Human Resources. This success is not just a milestone but also a reminder that dedication and determination can open doors to endless possibilities.
